ELK'S CARNIVAL OPENS SATURDAY NIGHT

Coal Creek Will Enter Elk's Carnival Finals for Grand Challenge Cup

September 7 and 9

Sopko Plays Brilliant Game Against Coleman Eleven

In the hardest fought soccer battle of the entire season Coleman bowed themselves out of the Grand Challenge cup only after extra time had been played and the fans had been on their toes with excitement at the thrilling brand of play. To Coal Creek go the spoils as they won the game on their merits two goals to one. Their clean kicking and never-say-die spirit stood them in good stead as Coleman drilled shots from all angles at their goal. To Sopko, brilliant goalkeeper of Coal Creek, goes credit for saving his team on many occasions when a goal seemed inevitable. McCloy of the local defence did yeoman work and deserves credit for his play.

Opening exchanges were even, with both teams feeling each other out. Atkinson was slightly injured, allegedly fouled by a Coleman player. A penalty kick was allowed, Smith taking the spot kick only to have Ford make a splendid save to clear. Coleman pressed and Coleman missed a heart-breaker when Joyce headed over the bar when only a foot from the goal-line. Ford was in error when, in endeavoring to clear, he kicked the ball directly at an opposing player, the ball rebounding and rolling past the upright of the goal. Moore and Ball dribbled the ball close to Sopko, Ball shooting at point blank range only to have Sopko save brilliantly. Coal Creek continued to have a fair share of the play and received their second penalty when Hastings fouled Atkinson inside the penalty area. Atkinson took the kick, the ball rebounding off the crossbar, Coleman conceding two corners before being cleared. The game came into the limelight when they hemmed Coal Creek in around the latter's goal for about five minutes only to have Jim Anderson kick the ball past the goal. Atkinson finally opened the scoring when he cleverly beat both Coleman backs to give Ford no chance to put Coal Creek ahead.

The opening minutes of the second half saw Johnstone shoot over the Coleman goal in his efforts to score. W. Anderson was unlucky when he lobbed the ball barely over the bar. Joyce put Coleman on even terms when he took advantage of McCloy's error to shoot the ball past Sopko. With this encouragement Coleman took a decided advantage in play and the Coal Creek defence were hard worked to clear. On one occasion the ball travelled across the Coal Creek goal mouth with nobody to boot it home. Watson was playing a great

Fun for young and old will be plentiful at the Elks' big carnival which will take place on Saturday and Monday next. Leather-tongued barkers will be shouting entreaties at the milling crowds to patronize their respective booths where worth-while prizes await the lucky ones. Arcadians' orchestra will supply music each night at the jitney dance, where the young people will have the opportunity of exercising "those dancing feet."

Tickets on the two major prizes, a Marconi cabinet radio of the latest design, and a nine-piece chesterfield suite, can be had from any Elk or they can be secured at the arena.

The carnival is being staged solely for the purpose of aiding worth-while community purposes for which the Elks' lodge is noted, and Coleman people are expected to turn out in large numbers.

James Ford Taken Suddenly Ill

Mr. James Ford was taken seriously ill at the coast last week, necessitating cutting his vacation short and being brought back to Coleman as quickly as possible. Mr. Ford has been suffering a leg ailment for the past month which resulted in blood poison setting in. Mr. Ford was taken to Calgary where he was met by Dr. MacLean and brought to Coleman by train. Mr. Watkins who accompanied him on the trip driving Mr. Ford's car to Coleman. He was admitted to hospital on Sunday morning, the injured foot being lanced on Monday, and on Tuesday his condition was reported more favorable. While confined to hospital Mr. Ford's town and school duties will be cared for by his daughter, Mrs. A. L. Watkins, of High River, who is visiting here.

A Correction

Mr. William Atkinson called The Journal up to state that in connection with his appointment as assistant caretaker in the public schools, he had resigned from the trustee board some time prior to the applications being considered by the trustees, and The Journal makes this correction in order that it might not be taken that he was on the board when applications were dealt with.

Mis-Spelt Word Contest

The intentional mis-spelt word in the issue of August 29 was "Pimento" in Ed. Ledieu's advt. It was spelt "Piemento."

Other entrants found the word "disappointment" also in Ledieu's advt. This, however, was a typographical error and was ruled out of the contest. Those sending in entries were Wilhelmine Michalsky, Reta Ash, Dorothy Wilton-Clark and Herbert McCullen.

Miss Michalsky was the only entrant picking the intentional error and will receive one year's subscription to The Journal.

Miss Winnifred Dunlop is spending two weeks' vacation at the coast.

game at this time and was close to scoring on several occasions. The final whistle blew with the teams deadlocked 1-1.

Thirty minutes' extra time was played to break the tie and in the first half Coal Creek dominated the play, the Coal Creek outside right hitting the upright with Ford well beaten. "Scotty" Johnstone finally broke the tie when he shot the ball past Ford to put Coal Creek one up. Coleman played desperately in the second half and brought the fans to their toes time and again with their dangerous thrusts on goal, but weak finishing offset this advantage, coupled with the brilliant work of Sopko in the nets. Final result was 2-1 in favor of Coal Creek.

Coleman—Ford, Griffiths, McCloy, Fraser, Watson, Hastings, W. Anderson, J. Anderson, Joyce, Ball, Moore. Coal Creek—Sopko, McKay, Ferguson, Cairns, Simpson, Smith, Johnstone, Milburn, Atkinson, Artherton, Webster.

Referee—Thomas, Michel.

Coal Creek will meet Blairmore on Sunday at Michel in the final of the Grand Challenge cup. J. Dugdale, referee.

PREMIER TURNS CAMERAMAN

When, after the first council meeting of the new cabinet, Prime Minister R. B. Bennett posed with four newly appointed ministers for a news-reel talking picture, he displayed keen interest in the sound camera's mechanism. "How does that gadget work?" he asked, and was promptly invited to try it for himself. Here is Mr. Bennett, his right eye glued to the view finder, trained on the Peace Tower. Professional cameraman Roy Tash is demonstrating. Note Mr. Bennett's hat on the grass beneath the tripod. In other words—his hat is in the ring.

Record Relationship Between Company and Employee Broken

Ill-health was responsible for severing one of the oldest relationships between company and employee in the history of the Coleman mines on Thursday last when Harry Clark, International time keeper, resigned from his employment at the International mine after 23 years of service.

Coming to Coleman shortly after the International mine started Mr. Clark secured employment from the company in 1907 to begin a record of service and loyalty to the company which will long be remembered. Mr. Clark has watched the mine grow from a humble beginning to one of the major mines in the province in the production of coal.

Recently when the local mines amalgamated, Mr. Clark was given the honor of bidding the retiring general manager and superintendent, Mr. O. E. S. Whiteside and Mr. J. McLeod, farewell in an address spoken in behalf of the International employees.

The Journal joins with Mr. Clark's many friends in wishing him many years of rest and happiness which he so richly deserves.

Crows Nest Pass Musical Festival

There will be added to the syllabus of the C. N. P. Musical festival 1935, a juvenile vocal class. This will include boys and girls up to the age of seven years and their own choice of song will be accepted.

Joe Venier, of Bellevue, was sentenced to ten days in jail, the result of an accident on the Frank slide on Saturday evening. L. Brazoni, a victim of the accident, is still in a critical condition.

Enrollment in Schools Same as Last Year

Public and high school teachers were busily engaged this week in restoring order to their respective grades as school reopened after the summer holidays.

In a statement to The Journal Principal Hoyle stated registration was approximately the same as last year. 110 students have enrolled in high school as compared to 108 last year. Public school have approximately 500 students, this being the same enrollment as in the previous year. 50 beginners were registered with Principal Hoyle the first two days of school.

It was found necessary to divide grade eight in two classes owing to the large number of students in this class. As a result Miss Wilson will teach grades seven and eight in the K. P. hall now used as a school-room, while the other half of grade eight will be taught in Central school.

ST. ALBAN'S CHURCH NOTES

Next Sunday—The twelfth after Trinity, the service will be: 11.15 a. m. Holy Communion and address.

12.30 Sunday school.

Harvest thanksgiving will be held on Sunday, Sept. 15, at 7 p. m.

Girl Guides Pass Life-Saving Tests At Lee Lake

To Receive Certificates from Royal Life Saving Society

Seven of the nine Girl Guides who were to qualify for their certificates in the Life Saving tests went to Lee Lake on Friday morning, owing to Mr. Greene, the examiner, not arriving on Thursday afternoon as arranged. Those undergoing the tests were Joanna Flynn, Mary Hoyle, Sheila Devine, Isabel McDonald, from Coleman; and Kathleen McDonald from Blairmore; Kathleen and Dorothy Costick, of Bellevue. Mrs. R. P. Borden, district commissioner, and Miss Ruth Morrison, lieutenant of the Second Coleman company, accompanied the girls. The girls will be recommended by Mr. Greene for their certificates. They passed in three tests—the Elementary, Intermediate and the Bronze Medal. The recommendations are sent on to England by Mr. Greene, from where the certificates are issued by the Royal Life Saving Society.

The Guides received their training at their summer camp at Rock Lake in July, under Miss Marie Sharkey, of Calgary, who was specially engaged by the local Guides for this work. They are to be congratulated on their perseverance and success in passing their exams, for knowledge of life-saving is a very valuable asset in times of emergency when a life might be saved by knowledge of the correct methods of resuscitation and

Motorists---Take It Easy

The highways of North America are dotted with thousands of motor cars as people travel from city to town and town to city, and as they proceed on business journeys. Each and every one of these cars is a high-powered vehicle, capable of doing almost incalculable damage unless handled with judgment and discretion. Whether you and your friends enjoy the motor trip you may be making depends not on the speed you travel, but whether you arrive safely at your destination.

In the United States last year there were almost one million motor accidents, with 36,000 deaths. The accident and death rate in Canada is almost as high, Ontario last year recording 512 deaths and 8,990 accidents which were not fatal, but many of which meant people scarred and maimed and intense suffering for hundreds.

In the driving of a car, a man reveals himself. It is the thoughtless, selfish, reckless driver that is largely responsible for the toll on the highways. What is gained if a man arrives at his destination a few seconds ahead of schedule? Why do so many men, when seated behind the wheel of a car, act like bores and leave behind them every vestige of courtesy and consideration for others?

The motor is a wonderful invention, but in the hands of a man without judgment or balance, is a terrible instrument of destruction, leaving death and maimed lives in its wake. In the August issue of that popular little magazine "Reader's Digest" there appeared an article entitled "—And Sudden Death" which has attracted continent-wide notice and hundreds of thousands of persons who are being distributed throughout Canada and the United States. The only regret is that a copy cannot be placed in the hands of every driver who drives an automobile. It is a gruesome recital of what automobile accidents really are,—a realistic portrayal of scenes witnessed every day on the highways of this supposedly civilized continent.

The automobile, says the writer of this article, is a treacherous, just as a cat is. It is tragically difficult to realize that it can become the deadliest missile. As enthusiasts tell you, it makes 65 an hour feel like nothing at all. But 65 an hour is 100 feet a second, a speed which puts a viciously unjustified responsibility on brakes and human reflexes, and can instantly turn this docile luxury into a mad bull elephant.

Collision, turnover or sideswipe, each type of accident produces either a shattering dead stop or a crashing change of direction, and the original occupant—meaning you—continues in the old direction at the original speed, every surface and angle of the car's interior immediately becomes a battering, tearing projectile, aimed squarely at you—inescapable. There is no bracing yourself against these imperative laws of momentum.

It's like going over Niagara Falls in a steel barrel full of railroad spikes. The best thing that can happen to you—and one of the rarer things—is to be thrown out the doors spring open, so you have only the ground to reckon with. True, you strike with as much force as if you had been thrown from the Twentieth Century at top speed. But at least you are spared the lethal array of gleaming metal knobs and edges and glass inside the car.

Anything can happen in that split second of a crash, even those lucky escapes you hear about. People have dived through windshields and come out with only superficial scratches. They have run their heads against the reducing both to twisted metal, and been found unharmed and arguing bitterly two minutes afterward. But death was there just the same—he was only exercising his privilege of being erratic.

And every time you pass on a blind curve, every time you hit it up on a slippery road, every time you step on it harder than your reflexes will safely take, every time you drive with your reactions slowed down by a drink or two, every time you follow the man ahead too closely, you're gambling a few seconds against agony and sudden death.

There is an old legal phrase that "time is of the essence of the contract." This is not true on the highway; the reverse is true. Your duty as a driver is to bring safely home not only yourself, but your family and friends who may be travelling with you. Equally, it is your duty to so drive your car as to in no way endanger others but to allow them to likewise reach their homes in safety.

Rebuild By New Method

Worn Machine Parts Made As Good As New

Fired at the speed of a rifle bullet, particles of hot metal rebuild worn machine parts by a new method. Screw heads are cut into the surfaces to be repaired, and then the metal is sprayed on the grooves and ridges in such a way as to "freeze" and become part of the metal under treatment. The spraying is done with an electrically operated gun that "shoots" the metal particles through a tiny hole in the nozzle at 2,700 feet per second. The rebuilt parts are smoothed and polished with abrasives, giving long wear. Piston rods, cylinder walls, shafts, bearings and turbines are among the parts treated successfully.—Popular Mechanics.

There are 23 different kinds of alcohol commercially produced.

Jubilee Week Was Busy

King's Secretaries Replied To Over Ten Thousand Messages

Statistics just available give some indication of the work performed by His Majesty's secretaries during Jubilee week. During the period May 3 to 9 the King received 10,864 telegrams from every conceivable part of the world. Every sender of a telegram within the British Isles, no matter what his rank or station in life, had a reply sent him by His Majesty or by one of the private secretaries. Over 10,000 messages were similarly answered, the more important by cable, but many by a personal letter from the King's secretaries or His Majesty's representative in the Dominions or Colonies.

A new metal, invented by a British firm, is lighter than aluminum, as strong as cast-iron, cheaper than brass, impervious to sea-water, and can be bent when cold. It is in use by the admiralty.

The hydrax is the nearest living relative of the elephant. It is a little animal no larger than a rabbit and is erroneously designated in the King James Bible as a coney.

All houses on the main street of Jendabul, Turkey, are red, by decree of the municipal council. On feast days they are draped in the Turkish colors.

Worked Under Difficulties

French Engineers Had Hard Job Building Hotels in Algeria

As the French penetrate further and further southward into the Sahara, pacifying the roving Arab tribes as they go, hotels are being erected for the accommodation of Government officials, visiting Army officers, business men and the occasional venturesome tourist. The hotels had to be taken south, through the desert, in parcels. Each parcel weighed about 200 lbs., and was one camel-load. Caravan after caravan, travelling forty-five days through sand, brought to Timimoun, in the far south of Algeria, the many tons of windows, doors, glass, china, linen, cutlery, furniture, electrical installation and other equipment needed for the local hotel. Neither foremen nor European laborers would agree to go there, so the place was built by French army engineers, who themselves had to trace in the sand the first outline of the building because the superstitious wild Arabs of the region feared The Evil Eye, and would not have anything to do with blue-prints. They did consent to make the mud bricks, however, which form the walls, and to drag up to the site the date-palm trunks forming the roof beams and "girding-work." The rest had to come in parcels. Even the ships of the desert bringing the parcels were temperamental. They would not travel on even such good roads as were to be found along their line of route, but had to be steered over soft sandy courses. Camels suffer from bad spells of foot soreness unless allowed soft tracks.

Drama Festival Finals

Dates Are Set For 1936 Contests In Western Canada

Regulations covering the 1936 Dominion drama festival provide for contests in 11 regions into which Canada is divided for competition, with a final week in Ottawa beginning Monday, April 20.

Issued by J. A. Aylen, honorary secretary-general of the festival, the regulations set the following dates for English play regional festivals in western Canada: British Columbia (Vancouver), Jan. 27 to Feb. 1; Alberta (Calgary), Feb. 6, 7, 8; Saskatchewan (Saskatoon), Feb. 13, 14, 15; Manitoba (Winnipeg), Feb. 20, 21, 22.

Regional festivals for French plays will be held in Quebec City, Montreal and Ottawa on dates to be arranged and announced later. No play performed in the finals at Ottawa in 1934 or 1935 will be eligible for presentation in 1936, the regulations set forth. As in the past the festival will be restricted to one-act plays or single self-contained scenes from longer plays which occupy not less than 20 and not more than 45 minutes.

Direction of the festival again will be in the hands of Col. H. C. Osborne, honorary director, and an executive committee. In each region a regional committee will have charge.

A government laboratory in Texas has succeeded in producing helium 99.96 per cent. pure.

AS ETHIOPIA RALLIES TO ARMS

Doing their bit

Imperial guard

Men, women and even children in Ethiopia have rallied to defend their country from threat of war by Italy. In the upper photo, two women are busy making uniforms for the rapidly mobilizing army. Members of the Imperial Guard (below), carry bayonets on their guns and are products of training by imported military experts.

Lighthouse Heroine Dead

Madame Matelot Won Overnight Fame On Belle Isle

Mme. Matelot, heroine of marine tradition, died recently at Lorient, France.

It was in 1910 Mme. Matelot (the translation of whose name is "sailor") leaped in one agonizing night to world fame, won the admiration of mariners the world over, and subsequently the Carnegie Medal for heroism and the Legion of Honor.

Her husband was the lighthouse keeper at Kerdouan Light on Belle Isle. As he was about to set the light in motion one twilight it would not throw its warning rays across treacherous shoals.

The woman called her children and made them turn the heavy light all night while she tried to aid her husband start the machinery.

When the children no longer could continue the endless grind, the mother took up the task and kept the light turning until dawn, when she collapsed as help arrived.

Sir Herbert Robson

Prominent Grain Merchant Dies Suddenly in England

Sir Herbert Robson, prominent grain merchant and chairman of the Baltic exchange, died suddenly in London. He was 61 years of age.

Sir Herbert was a foremost opponent of governmental measures for restriction of wheat production and control of world wheat trade.

Sir Herbert died at Malden, Essex. He was born in Northampton in 1874.

He was a director of a number of important companies. Twenty years ago he was chairman of the chamber of commerce of Karachi, India, and a member of the Bombay legislative council.

Used Like A Pencil

No Pressure Required With New Tool For Engraving

For engraving on gold, silver, brass, copper, aluminum and other metals as well as bakelite, catalin, ivory and hardwoods, a plug-in tool that is used like a pencil is available. No pressure is required, the operator writing or printing as with a pencil. The tool cuts rapidly with a chisel-like stroke. The powerful little motor operates on 110-volt, a.c. circuits, the standard lighting current used in homes. The engraver fits the hand.—Popular Mechanics.

Times Have Changed

Back in the good old days a boy could go to a picnic and have a dandy good time on two bits. He would ride the merry-go-round a couple of times, drink a glass of red lemonade and spend the other dime for a ticket to a minstrel show. But how things have changed. A boy of the same age in these fast-changing times will spend at least \$2 or \$3, and blamed if we believe he has as good a time as the boy who took a quarter with him for his day's expenditures at a picnic.

There are 15 per cent. more earthquakes when the moon is nearest the earth than there are when it is farthest away.

FASHION FANCIES

"WRAP ME UP" HOME FROCK OR "COVER ALL" BECOMING TO SLENDER AND MATURE FIGURES

By Ellen Worth

Here's a new type of wrap-around apron frock, that is quite smart.

It has a paneled bodice that carries down into the skirt, that would flatter any figure. The flared sleeves are pretty.

Calico or percale print is especially nice for its development. As a "Cover-All" to wear over one's "best" frock to prepare dinner, it is nice made of a dimity print.

It's unbelievably simple and inexpensive to make it. Style No. 310 is designed for sizes 14, 16, 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 4½ yards of 35-inch material.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

Autumn Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Polar Hop Postponed

The attempt of a Soviet aeroplane to fly non-stop to San Francisco, by way of the north pole, has been postponed until the summer of 1936. It has been officially announced. The setting in of the polar night was given as the reason for the postponement.

Were Paid Union Rates

Trade union rates of a penny per rivet were paid to Lady Kelly, wife of Admiral Sir John Kelly, and other officers' wives when they drove the first rivets into the plates of the new cruiser Aurora at Portsmouth.

A \$5,000,000 steel plant will be built at South Durham, England.

Predicts Horseless London

Ministry Of Transport Working Toward Mechanized System

Within five years, it is predicted, the London draw horse will be so rare in London as to be regarded as a curiosity, the streets of 1940 being practically entirely free of horses. The Ministry of Transport is hastening this condition by plans to substitute horse-drawn traffic by a completely mechanized system, and some of these plans will be carried into effect shortly.

The busiest streets in London will be closed to horse-drawn traffic in the near future by regulations soon to be issued by the department. Already there is a device operating in Oxford street between certain hours. Later an edict will be issued that horse-drawn vehicles will not be allowed in London at all after a period of from three to five years.

Under existing traffic legislation, the Minister of Transport, L. Horne-Bellah, has power to put an end to traffic by horse in London's streets. This department, however, has no intention of driving horses from the streets until their owners have had fair warning.

Eastern Excursions

Bargain Fares Offered By C.P.R. and C.N.R. For Early Autumn Trip

Popularity of early autumn bargain fares to eastern Canada last year has induced the Canadian Pacific and Canadian National railways to offer similar travel privileges in September of this year, according to an announcement by Joseph B. Parker, western secretary, Canadian Passenger Association.

This fall weather rate, attractive after the heat of summer, begins with a ticket sale from September 21 to October 4 and bears a final return limit of 45 days in addition to the date of sale. Stop-over privileges go with the tickets within a limit at the stations of Port Arthur, Armstrong and east.

Tickets will be honored in coaches, tourist or standard sleepers on payment of fare according to the accommodation desired. They will be on sale from all stations from Port Arthur, Armstrong and west, including Pacific Coast points to all stations including Sault Ste. Marie, Sudbury, Coburne and east.

Not Empty Handed

An Italo-Abyssinian dispute has arisen in Amsterdam—the Abyssinian, a commissionaire at an Italian restaurant, gave notice that he was returning home to join the army. As he was leaving the building, the Italian proprietor noticed he was carrying a large bundle. Asked what it contained, the man replied "Revolvers." But police summoned to the scene discovered it was a quantity of the restaurant's silverware.

Cleaning Railway Coaches

The latest method of cleaning railway carriages is that used by the German Federal Railways. The carriage is run into a huge airtight cylinder into which is pumped a strong disinfectant gas. The carriage remains in the gas long enough to allow it to penetrate every chink and corner, so that all harmful bacteria are killed.

Reported De Valera Will Abolish Post Of Governor-General

Dublin.—Eamon de Valera's forthcoming new constitution for the Irish Free State will contain a surprise for the other members of the commonwealth, according to well informed circles here.

He is to abolish the office of governor-general but that will not mean the Free State will have no representative of the crown. The new constitution will provide for the merging of the duties of the office of governor-general in the president of the executive council.

As the president of the executive council is Mr. De Valera, it will be seen that he himself will discharge the functions of the governor-general in the signing of bills passed by the dail and approved by the new advisory council which is to take the place of the senate.

In the new order of things, the powers of the president of the executive council may be considerably extended.

While the other states of the commonwealth are busy with elections and schemes to capture larger slices of the British market, Mr. De Valera is calmly proceeding with his plans to re-write the existing constitution. It has already been amended no fewer than 25 times — 17 times by William Cosgrave during 10 years of office and eight by Mr. De Valera during two years. Six of Mr. De Valera's amendments have become law and the remaining three, abolishing the representation of the Irish universities in the dail and abolishing the senate itself, are approaching maturity. No complete copy of the instrument as it is at present is available as the stationery office considered it was too expensive to print new after every amendment.

Wheat Conference

Advisory Committee Ends Sessions In Winnipeg

Winnipeg.—The wheat advisory committee ended its three-day sessions here, and the seven members, representing all sections of the grain trade, left for their homes. Though no statement was issued at the close of the meeting, the first since the committee was appointed recently, it was understood the committee had made its recommendations to the Canadian wheat board respecting the minimum price of Canada's 1935 crop.

The board, in turn, will report to the minister of trade and commerce and, it was said, any announcement must come from Ottawa.

Conquers Mountain Peak

New York.—Word was received by the American Geographical society of the successful ascent of Mount Steele, 16,439-foot high, by Walter Wood, who led an expedition for the society into the Yukon territory. The feat has never before been accomplished.

Seeking Migration Rights

London.—The Daily Herald declared the Japanese government is preparing to open diplomatic negotiations with Great Britain, Holland and other powers "with the idea of securing migration rights in the Far East for several millions of her surplus population."

Makes Appeal To World's Statesmen For Era Of Co-Operation

London.—An appeal to the world's statesmen, including those of the United States and the Soviet Union, to end imperialism and establish an era of co-operation was made by George Lansbury, Labor leader in the house of commons, in an interview with Havaas.

"I would like to see the leading statesmen of the world," Lansbury said, "including Joseph Stalin, Premier Mussolini and the statesmen of the United States and Japan, come together determined to turn out imperialism and enter the sphere of co-operation."

"There is room enough for all, raw material for all, markets enough for all. Let us have common sense enough to share them co-operatively for the advantage of all."

"The whole public opinion of the world stands behind the League of Nations. We agree with France the

Better Wheat Yield

Southern Alberta Farmers Are Pleased With Returns

Lethbridge, Alta.—Southern Alberta farmers are happy today. Wheat which, in the middle of July, it was feared would not be worth cutting, is giving a yield far beyond early forecasts.

Instead of an average crop of 10 bushels to the acre, it was estimated today wheat in the Lethbridge area would run to an average of 12 to 13 bushels to the acre.

"Not only are yields surprising but the quality of the grain is the best for some years. Much of it is grading No. 1 NW, No. 1 Northern and No. 2 Northern."

Many fields which five weeks ago appeared a loss, are now yielding from 15 to 25 bushels to the acre. It was estimated the farmers would have from 3,000,000 to 4,000,000 more bushels of wheat to market than early estimates indicated.

Plan Brought Results

New York Relief Takers Prefer Work

New York.—New York's "work or go to jail" policy for relief recipients produced what an official called "amazing" results in its first test.

Applicants were reported by observers to be taking works progress administration jobs at the rate of one a minute in some offices.

It appeared about 5,000 laborers had been removed from the relief rolls to jobs in one day.

When relief offices opened a line of men and women awaited to take the \$5-a-month relief jobs. Over the weekend they had read an edict that those who refused work would first be cut off from relief and then, if they proved stubborn, be prosecuted for failure to support their families.

Paderewski On The Air

Will Broadcast Program From Switzerland On October 12

Geneva.—Paderewski is going on the air for the first time. From the living room of his villa at Morges, between Geneva and Lausanne, on the shore of Lake Geneva, he will play an all-Chopin concert for 90 minutes, Saturday, October 12. The international broadcast was arranged by the Societe Roman de Radiodiffusion. American handling is over the WJZ network of the National Broadcasting Company, from 10:30 to 12 noon, E.S.T.

No other concerts are planned by the Polish pianist this year. Fritz Kreisler now remains the only world-famed artist to refuse going on the air.

Ontario Relief Payments

Toronto.—Relief sum payments to Ontario municipalities after September 1 when they will have to look after their own relief administration will be lump sum payments scaled according to the ability of the municipality to pay its own way and based on the number of persons on relief. Hon. David A. Croil, Ontario minister of welfare, said.

"We are strongly of the opinion if Mussolini needs expansion the goodwill of the league will be exercised to enable the Italian people to get everything has a right to, while preserving the full rights of the Ethiopian people."

"There should be at the very earliest moment—I wish it were now—a world conference to discuss how we can remove causes which bring about armaments and wars."

"It is sheer folly to go on dealing with effects and leave causes untouched. Though the world's economic resources are enormous, hundreds of millions of people are without the necessities of life."

Fatal Automobile Crash

Queen Astrid Of Belgium Meets Death In Accident In Switzerland

Lucerne, Switzerland.—Astrid, 29-year-old mother of three children, was fatally injured when thrown from a car Leopold was driving. She died in his arms on the roadside, while a village priest gave extreme unction.

The injury which caused Astrid's death, a fractured skull, was identical to that which killed her father-in-law, King Albert, 18 months ago. A Swedish princess before her marriage in 1928, she retained her beauty in death.

"Her face suffered hardly any disfigurement at all," said Sister Brun, the nurse who prepared the body for burial. "She has a slight bruise under her chin. Otherwise she remains as beautiful in death as she was before the tragedy."

Swiss authorities announced an official inquiry into the accident would be made.

The royal couple were on their way to do some mountain climbing—the same sport in which Albert was killed. The queen was dressed in sport clothes, while Leopold wore an Alpine costume and hobbled boots.

The queen's skull was fractured when she was thrown from the automobile. The car swerved and struck a tree when Leopold took his eyes from the road to look at a map Astrid was examining.

Moving at 45 miles an hour, the car hit the tree, bumped over an eight-inch curb and rolled over among reeds beside the road in shallow water.

High Price For Book

Half Million Asked For Copy of Lawrence's Last Book

New York.—The highest price ever quoted on a book at publication will surround those who inquire next winter about "The Mint," by Aircraftman Ross.

The price is \$500,000 the copy. Aircraftman Ross is T. E. Shaw and T. E. Lawrence and "Lawrence of Arabia." He used the name Ross for a time in an effort to avoid publicity when he was with the air forces.

His criticism of living men, of British institutions and of the profession of soldier and several other things are described by one who has seen the manuscript as so stringent that publication may not be had in England for many years, if ever. Lawrence wished it to be protected, but kept out of circulation.

So the book is to be set up and printed by Doubleday, Doran and Co. Two copies will be sent to Washington to secure copyright; 10 copies will be kept for sale. But it is not believed that there will be any takers at \$500,000.

Flies Without Controls

U.S. Bombing Plane Makes Successful Test

Dayton, Ohio.—Army air corps engineers at Wright Field announced a huge bombing plane flew successfully from Dayton to Cincinnati, 60 miles away, and returned, without a hand at its controls except during the take-off and landing phase.

The bomber is one of three flown here for tests for possible acceptance by the United States army.

"The engineers emphasized the purpose of the flight was to afford greater safety to pilot, crew and ship during adverse weather or in long distance flights."

W. H. HAYS

Liberal leader in Alberta, who succeeded in holding his Edmonton seat in the provincial elections.

South Polar Expedition

Canadian Aviators Arrive at Montevideo for Proposed Flight

Sao Paulo, Brazil.—As explorer Lincoln Ellsworth left here by aeroplane for the Mato Grosso jungles on a jaguar hunt, the Canadian aviators who will accompany the Ellsworth-Wilkins South Polar expedition this winter arrived at Montevideo.

Pilots Herbert Hollick-Kenyon, James Lymburner and Patrick Matthew arrived aboard the steamship Eastern Prince and announced they would test the expedition planes there.

Mrs. Ellsworth accompanied her husband on the hunt. On its completion, Ellsworth will go to Montevideo to join Sir Hubert Wilkins, who is preparing for the new expedition to the Antarctic. They will sail with the aviators in October for the polar regions.

To Recall Legislators

New Plan In Election Laws Promised for Alberta

Calgary.—Something new in election laws has been promised the people of Alberta by William Aberhart, leader of the Social Credit party that swept into power in the provincial election. For the first time in Canada, electors will have the right to recall legislators who fail to live up to their pre-election promises.

It is expected the Aberhart legislation will be patterned after the American recall laws although its details have not been decided. It is probable the act will provide that a recall plebiscite may be held if a certain percentage of the voters in a constituency favor it through a petition. If the plebiscite showed the majority of voters desired a new election, it would be held.

Britain Protests

Objects To Reported Remarks At Soviet Gathering

London.—It was learned from an informed source here that Great Britain protested at Moscow through Viscount Chilton, British ambassador, Aug. 19, against remarks expressed at the recent congress of the third international.

Georgi Dimitroff, who was elected to the permanent executive committee at the closing session of the congress, was reported to have said in a speech the National government in Britain was clearing the way for Fascism, and Communists in England were working for a return of a Labor government with a view to establishing a Soviet regime.

British Government To Use Seaplane For Trans-Atlantic Service

Can Pay For War

Italy's Financial Condition Can Take Care For Long Struggle

Rome.—Italy's financial condition permits her to contemplate waging war indefinitely—whether in Africa or Europe—informed sources asserted.

The informed sources explained, however, that Italy does not expect to have to support a prolonged campaign in East Africa. They believed if war comes, it will be a question of one gigantic assault.

Italy has a gold reserve of approximately 5,000,000,000 lire, which has fluctuated only slightly, due to government policy, a little less than 1,000,000,000 lire have been spent already for Italy's East African campaign.

Left Children To Starve

Woman Beheaded In Germany As Punishment For Crime

Berlin.—Charlotte Juennemann was beheaded in punishment for the crime of allowing her three children to starve to death. Willy Gehrike, 23, was put to death by the knife for robbery and murder.

Frau Juennemann, young, slim, blond, was convicted last March after testimony had been given that she had squandered in cafes and dance halls the money she had received for the relief of her three boys, four, 18 months and one year old.

"I had no time, to give the children food and water," the police quoted her. She was the fourth woman to lose her head on the chopping block this year.

Death In Hurricane

Expect Many Lives Lost In Newfoundland Gale

St. John's, Nfld.—A secret of the sea, Newfoundland's hurricane dead, remained uncounted, but reports seeping into St. John's from scattered villages indicated between 40 and 50 lives had been taken by the weekend gale that strewn wholesale death about the island's coastal waters.

With communication services disrupted by the storm, it appeared only the toll of the dead would not be known for days. Wrecked ships were scattered all along the island's eastern side; more were adrift at sea without crews, and others, possibly, had been sunk without trace.

Giant Candle

New York.—A white-haired, 75-year-old artist, who has manufactured some of the finest candles in the world, disclosed that he has received an order for a giant candle, to burn 500 years, as a symbol of gratitude to the saints for bringing Mme. Amelia Gall-Curci, operatic soprano, safely through a recent throat operation.

Federal Government Is Conducting Income Tax Investigation

London, Ont.—The Dominion government is conducting an income tax investigation which may bring the federal treasury several millions of dollars in tax arrears, it was disclosed here. The income tax department is probing unregistered shares of large Canadian industries, it was learned.

In its investigation the department expects to collect large sums of unpaid income taxes from many of Canada's wealthy men. The probe will go back for a period of from 15 to 20 years.

The investigation in this district is being conducted from the office of George Tambling, London district inspector of income tax. Disclosure of the investigation came shortly after the commission investigating the seven Spencer estates met here to officially wind up its work.

Commissioner John Cowan was appointed to investigate the estates of the family that pioneered in the oil industry. After a series of public sittings the case was settled.

Until recently there has been no check on the ownership of bearer share warrants or unregistered stock.

London.—The government has decided to use a so-called "composite seaplane" to inaugurate regular trans-Atlantic air service, an authoritative source disclosed. The first flight may be made late in 1936.

Plans have gone past the speculative stage and the government has decided to stake everything on this new type of plane—actually two planes take off but only one makes the crossing.

A four-engined flying boat is one component of the composite aircraft. It will take off with a four-engined seaplane on its back. The seaplane will be capable of carrying 1,000 pounds of mail and fuel for a 2,000-mile crossing in the test of a 60-mile gale. The parent ship will launch the seaplane at probably 5,000 feet, or thereabouts.

The importance of this decision is apparent in view of the fact Britain controls the key stations on both northern and southern routes — the Bermuda and Newfoundland.

The composite plane service will be used for mail-carrying purposes only at the start.

Express Rate Reductions

Lower Costs On Long Haul Shipments Have Effective

Montreal.—Rate reductions on long-haul heavy express shipments became effective over the lines of all railway express companies in Canada Sept. 2. It was announced by the Express Traffic Association of Canada. The new rates are said to represent more than 20 per cent. reduction.

Some time ago express rates on packages 15 pounds and under were considerably reduced, but in order to take advantage of those rates shippers frequently found it necessary to split large shipments into small packages. This entailed an increase in packaging costs which are said to be removed now. The present reduced rates on packages 15 pounds and under will remain in effect.

Repairs To Railway

Consider Question Of Replacing Ten Miles of Track In Flood District

Edmonton, Alta.—Whether or not 10 miles of Northern Alberta Railway tracks in the Lesser Slave Lake flood district will be re-laid this fall at an estimated cost of \$750,000 is being considered by the C.N.R. joint operating committee maintained by the Canadian National and Canadian Pacific railways, was the information given out by A. E. Warren, of Winnipeg, vice-president in charge of western lines, C.N.R., and chairman of the committee.

Many Farm Jobs

Toronto.—Late returns to the Ontario department of labor showed that more than 2,400 unemployed single men have been placed on farms through the work campaign operated by Premier Hepburn ordered closure of the hotels.

PRINCESS WEARS DANCE BAND LEADER

The bride and bridegroom at the cake at the wedding at the Mayfair Hotel, London, of Princess Pearl, daughter of the white Rajah and Ranees of Sarawak to Mr. Harry Roy, a famous dance band leader of London.

NOTES AND COMMENTS

TWO WEEKS have passed since the startling provincial election, but it remains a popular topic of interest. Truly, Aberhart stated the eyes of the world will be on Alberta, a statement which newspaper comment from near and far amply confirms.

PEOPLE ARE still wondering how the new premier will put his policies into effect. While many still hold fast in faith that basic dividends will be paid to the people, there are many who voted for Mr. Aberhart who care not so much if a dividend will be paid, but that they have awakened the old line parties to the fact that they desire a change.

THINKING PEOPLE realize that change can come but slowly. No system can be changed overnight, and open revolution would produce chaos, which might be compared to jumping from the frying pan into the fire. Mr. Aberhart's emphasis that the people must have patience shows he realizes it. Many who openly opposed the Social Crediters, but who credit Mr. Aberhart with sincerity in his attempt to try and more evenly distribute the profits of production, await with sympathetic interest legislation which he states will abolish poverty in the midst of plenty. The real awakening will come in grappling with cold-blooded material facts, which appeals to emotion and sentiment cannot solve. We can only wait and wonder now that a Social Credit government has gained control of the legislative halls.

THESE IMPRESSIONS are written while on a holiday in the neighboring province of British Columbia. In Vancouver, where Gerry McGeer is mayor, it will be remembered it was comparatively recently that he was elected by a large majority. He has found that his enthusiasm for reform was far ahead of his ability to implement his extravagant promises, and some go so far as to state if he was to run today he would be as decisively defeated. Public opinion is a very fickle jade, particularly so in times of stress and industrial impression. Usually from the mass of conflicting theories the chaff is sifted from the wheat, and this process is apparently going on throughout Canada.

IT DOES one good to get away occasionally and thereby gain an unbiased perspective on purely home affairs. While on the train, we saw a very glowing write-up on Coleman as a mining centre, which we read with satisfaction.

It reminded one of the fact that Coleman has much to be thankful for in increased employment, and though by nature we are not prone to sound our own trumpet, yet the page devoted to our town in last Saturday's Calgary Herald may possibly have helped our citizens to regard with appreciation the benefits we at present enjoy.

AT TIMES we may envy the people of the larger centres of activity for the imagined advantages they enjoy, yet we in this section of the Rockies enjoy many healthful advantages which city dwellers would be glad to possess. There is more freedom in the smaller centres, greater scope for individualities, and a far greater warmth of neighborliness. Life may move at a slower tempo; but after

all, what real advantages lies in the city as against the country town? The ambitious and extremely energetic person may chafe at times against the seeming slowness of his rural brethren, but there is more real life and less artificiality in the country than in the city. Each has it within his or her power to improve the little corner in which they live, possibly to a far greater extent here than elsewhere. Life is largely what you make it, and your mental outlook towards it governs your actions for good or for evil.

IF WE fall short of filling our column this week, we ask the indulgence of our readers. Newspaper life does not permit a very long vacation, but one feels the necessity of a change at least once a year to prevent becoming too hide-bound. We view from afar the good points of our fellow citizens, even if we do disagree with some of them in politics or minor matters, but the old saying that distance lends enchantment to the scene can apply as well when you are away from the old home town as to the distant fields when you view them from your own backview. After a short holiday in British Columbia, imbibing a little of the salty atmosphere of the Pacific Ocean and the less pacific atmosphere of its policies, we will return to sunny Alberta with renewed vigor to pick up the axe handle and start on the winter's wood supply and writing a few more paragraphs for this weekly "kolyum".

MCBAIN'S LAKE NEWS IN GENERAL

Fishing in McBain's Lake, which is about 32 miles from Fernie, was never better than it has been this year. Mr. Montalbetti, of the Electric Shop, Coleman, while at the Vernon cottage, got a big one, and, what is more, has pictures to show that the fish did not get off the hook, as most fish stories go. Mr. and Mrs. Montalbetti and son spent two weeks at the Lake and had several visitors from Coleman over the week-end, who were loud in their applause regarding the cottage, fishing, boating and swimming.

The Canadian Legion camp, under the direction of Mr. Jack Manning, of Fernie, B.C., late president of the Legion, is having a very busy time at the camping grounds. Many people from Michel, Natal and Cranbrook registered there and had a wonderful time.

The public beach, under the management of Mrs. Rosen, of Jaffray, has had quite a few visitors from Alberta, the U.S. and many points in British Columbia. Mrs. Rosen carries a full line of groceries and smallwares for the convenience of the campers along the lake front.

Dick Vernon has had Gordon Barrett, of Fernie; Douglas McDonald, of Rossville; Bill Blackie, of Fernie, and Earl Tiber, of Michael, late of Coleman, as pals in crime for several weeks at the Vernon cabins, enjoying motor boat rides, fishing, swimming and what have you.

Joe D'Andrea, of Coleman, says that McBain's Lake can not be beat for a real good time. Joe has made several trips this summer with Melville Vernon, of Coleman.

Miss Linda DeCocco was a visitor at the Vernon cabins this summer with her brother Feruccio.

Hard surfacing of the road between Elko, B.C., and Fernie, B.C., is now in full swing. Autoists going west from Fernie will have to take the old road, which is in good shape and a marvel as far as scenery is concerned.

Word from Michel, Natal and Fernie

seems as though the people of these towns are quite concerned with the results of the last Alberta elections. Watch the next B.C. elections. Will Mr. Aberhart invade B.C. with his Social Credit?

According to U.S. visitors, Canadian scenery and hospitality cannot be beaten. But when they speak of our roads, they have tears in their eyes. The Alberta roads are good, but B.C. roads—"Nuf sed." Ask the tourist. They have a rattling good time going through B.C.

Aberhart of Alberta has set the pace. It takes Alberta, sunny Alberta. Continued on Page 5.

Everyone has good points and bad points, but if the good points overshadow the bad points, one can overlook the bad. To err is human, to forgive divine. In living too close to each other bad qualities are at times magnified when it would be better if people looked for the good in each other, thereby adding to life's pleasures.

Coleman is a town of congenial people and prosperous environment.

"GOOD TIMES CAN COME AGAIN"

Reviewed by John Edwin Price
(Quotations with permission)

Stephen Leacock, head of the Department of Political Economy of McGill University, Montreal, has an interesting article under the above title in the June issue of "Current History."

He says, "Five years ago the world's industry, running at top speed, almost came to a full stop. The world's economists stand like mechanics round a broken motor car, tapping and tinkering. What went wrong? How can it be set right? What measures of reconstruction definite, clear, immediate and flexible could restore and maintain the prosperity of the United States?"

The writer states that the success of running the old machine on individual ownership "was in a way more apparent than real, more at the top than at the bottom, more for the lucky few than the innumerable many. It kept it with it, in attendance, poverty, but hid it away for the most part in slums and dark corners."

He reminds us that Adam Smith and Thomas Jefferson, et al, thought the old machine would run forever because "every man for himself" really meant "every man for all."

"Over wages, indeed, there came a shadow; that was the dark corner. But in any case, it was argued, the dark corner was as light as it could be. Wages were as high as the fact of the situation allowed. A man 'got all that was coming to him'."

Mr. Leacock says that the World War speeded up the machine and broke it, and continues: "How can we get back to where we were and never again come to where we are? It is at this point of the argument that voices are raised in favor of abolishing altogether our social system and replacing it by some kind of socialism or communism. But this is worse . . . an escape from the frying pan to the fire, from a sizzling to a final combustion. The sizzling may at least end in a cooling down, but the fire ends everything. Let us sizzle a bit."

Miss Gertrude May, of Medicine Hat, is the week-end guest of Miss Hazel Watson, Ninth Street S. Miss May and Miss Watson will be leaving on Monday for the Sundial consolidated school where they will teach for the coming year.—Lethbridge Herald.

Whatever the need in a commodity, there is a UNION-MADE product; whatever the need for service, there is a UNION service.

Note—It is a pleasure for us to turn out printing that will help folks pass favorable judgment on you and your product.—The Coleman Journal.

The best publicity asset for any worth-while town is a live weekly newspaper printed by experienced and skillful workmen. Use your best advertising medium to give prestige to your business. Your printed matter goes where you cannot, therefore it should create a good impression.

A weekly newspaper neatly presented giving a reflex of community activities is an asset to a town which enterprising business recognize and support. Without a good weekly news medium something vital would be lacking.

McBain's Lake News

Continued From Page 4.

to show the world. I guess Gerry of Vancouver must have found the wrong "heart" of Aberhart. Talk is cheap, but it takes good money to buy good Canadian liquor. Remember that saying? Gerry says Jasper Park is so peaceful. When will Canada have inter-provincial trade licenses? It is harder to cross the Alberta-B.C. border at Crownstern than it is to cross the Canada-U.S. borders. That is according to U.S. tourists; they know and travel. It would appear that Alberta and B.C. were two belligerent countries with a border set up between them and many B.C. police at Crownstern to see that you don't get by. What a life! A free country. Oh yeah?

According to politicians, governments are big concerns. I wonder how big the League of Nations will prove to be? Corbin didn't have a big government behind them.—Contributed.

BUSINESS IN THE BIBLE

WORLD HAPPENINGS
BRIEFLY TOLD

Eleven Anglican cathedrals in South Africa, with each having a stone from Canterbury cathedral in England in token of "friendship and goodwill."

The United States tariff commission was under orders to investigate the competition between domestic and foreign pulpwood. Canada is the largest seller of this forest product in United States markets.

The Lewis machine gun, standard equipment for the British army since Great War days, is being replaced as rapidly as possible by a new and lighter weapon produced in Czechoslovakia known as the Bren gun.

Demonstration of a batteryless telephone which generates its electricity from voice sounds has been made by three Montreals—Armand Parent, Pierre Dufresne and Norano.

Four workmen were killed and four wounded when a road construction laborer sank a pick into an unexplored Great War shell. The accident took place on the road between Venice and Tarvisio, Italy.

A show place among southern Alberta farms, the 7,000 acres owned by the Duke of Sutherland estate, near Brooks, have been purchased by the Eastern Irrigation District. Five thousand acres are reported irrigable.

Word was received by the American Geographical Society of the successful ascent of Mount Steele, 16,430 feet high, by Walter Wood, who led an expedition for the society into the Yukon territory. The feat has now been accomplished.

The Daily Herald declared today the Japanese government is preparing to open diplomatic negotiations with Great Britain, Holland and other powers "with the idea of securing emigration rights in the Far East for several millions of her surplus population."

Early this month between 80 and 90 young Canadians will be taken into the Royal Canadian Air Force. From a "waiting list" of nearly 6,000 youthful flying enthusiasts the defence department has selected "this number to begin their three years' course."

Announcement of inauguration of a monthly air mail service between Port Chipewyan, Alta., and a new post being opened at Goldfields, Sask., was made by the post office department Sunday. Goldfields is situated on the north shore of Lake Athabasca, approximately 120 miles east of Port Chipewyan.

Canada's Canning Industry

Three Provinces Supply People With Fruits And Vegetables

The canning of fruits and vegetables is carried on most extensively in the provinces of Ontario, British Columbia and Quebec, where climatic conditions are favorable for the growing. The principal fruits canned in Ontario are: Apples, pears, plums, peaches, cherries, currants, gooseberries, blueberries, raspberries and strawberries. In addition, British Columbia has the apricot and the loganberry. The vegetables canned include: Tomatoes, peas, corn, beans, beets, carrots, pumpkin, squash, spinach and asparagus. The canning season begins in June and continues through the summer and autumn until October, being at its height in July, August and September.

The pack in 1933 consisted of 1,201,275 cases of fruits and 4,531,542 cases of vegetables valued at \$2,884,951 and \$9,257,296, respectively. Of the canned vegetables packed, tomatoes rank first in the number of cases with 1,659,856, baked beans with 1,045,796 cases coming next, followed in order by peas with \$22,880 and corn 401,856. Of the fruits canned, pears came first with 394,731 cases, followed by apples with 230,704 cases, peaches 161,615 and plums 135,716. Other important canned goods were: Soups of all kinds 1,438,523 cases and tomato juice 462,478.—St. Thomas Times-Journal.

Clerk—"These are especially strong shirts, madam. They simply laugh at the laundry."

Customer—"I know that kind; I had some which came back with their sides split."

Arctic medicine compared so favorably with European knowledge of the subject that Franciscan friars had the Indian native medicine taught in the first college they established for natives of Mexico.

To be 70 years young is seen in more cheerful and hopeful than to be 40 years old.

Has King's Medal

Indian Chief Proud of Present Given Sioux Tribe 150 Years Ago

Proudly displaying a medal given to the chief of his tribe 150 years ago by King George III, in recognition of their services to the British forces during the American Revolutionary war, Chief Sitting Eagle of the Pipestone Sioux, posed in Winnipeg for his picture recently.

"Chief," he was asked, "would your people consider taking this country back if it was offered to you?" The chief became indignant. People, apparently, are always asking him to take the country back and it's getting on his nerves.

"Ugh!" he morted. "We had this country once, when it was in a lot better shape than it is now. Palefaces won it, and Indian always plays for keeps. You got it, you keep it; no exchanges can be made on this goods, thank you," he declared.

"Ugh!" he morted. "We had this country once, when it was in a lot better shape than it is now. Palefaces won it, and Indian always plays for keeps. You got it, you keep it; no exchanges can be made on this goods, thank you," he declared.

ASSISTING NATURE

By Jack Miner.

During the past year I have read a number of articles both in magazines and in newspapers, as well as many letters that came to me, on the subject of "Nature's Balance," decriing actions or systems on the part of man which the writer described as "interfering with Nature," "upsetting Nature's Balance," and so on. To all who adopt that attitude, I should like to put myself on record to the effect that, personally, I believe the so-called "Balancing of Nature" was left entirely with man, and that I believe in assisting nature for the benefit of humanity. God created everything and then He created man "in His own likeness and gave him dominion over all;" that is, as I understand it, the power and authority to manage everything here on earth.

Look for instance, at the animal world, with the live-stock in the farmer's barnyard as example. Did God create the Jersey Cow, and Holstein and the Hereford? No. He gave man the original stock and the God, through man's instrumentality, developed many breeds, some for the high cream content of milk, some to produce the greatest quantity of milk, and some as the best beef cattle. All have been on earth a long time, of course; but their differences are the result of man's management. And, remember, man had to interfere with Nature to develop them.

Much the same thing is true of the Horse, different strains being cultivated for particular purposes, such as Clydesdales and Percherons for heavy draught work, and the blue-blooded descendants of original Arab stock for racing.

Recently I was in some of the southern States, where the character of the farm work to be done is too heavy for the common ass, yet where the climate is too warm to permit of the horse doing its best. In that part of the continent, therefore, man has crossed the ass with our common horse and produced a beast that withstands the heat and is also strong enough to do the work of tilling the soil. Yes, he has developed the mule. But the mule is not so far as I know, has gone no further.

In poultry, if you trace back various species, it is very easy to see that it has been the work of man that has developed the different breeds, Leghorns, Brahmas, Minorcas, Plymouth Rocks and so on, some of which are especially valuable as layers, and others as food. Our much prized turkey is nothing more or less than the wild turkey, domesticated and improved.

Seventy-five years ago our Canadian north-west was grazed by millions of wild buffalo (Bos Bison). Then came the white man who, realizing the value of the fertile soil, established a park where a herd was placed to preserve the species from extinction. The herd was kept in a fenced-in area, and the roaming herds and, turning the land upside-down, made it into one of the largest and most valuable of earth's great wheat-fields, with towns and cities and stately governmental buildings dotted here and there across its vast expanse. Remember, though, that in order to bring about this state of things, man had to "interfere with Nature," as some would call it.

And speaking of wheat-fields, wheat has been man's favorite food for centuries. Yet wheat, even as it was being grown in Canada in comparatively recent years, had certain weaknesses. It is to be planted in the fall and did not always survive the severity of the western winter. It was not producing as abundantly as seemed desirable and it did not mature rapidly enough always to escape the early autumn frosts. Then came our old man, the Professor Charles Saunders, cerealist of Ot-

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

lawa, and by study, experimentation and the rigid selection of choice grains, developed a wheat that could be planted in the spring, that would yield several bushels more per acre than had been the rule previously, that would mature within a certain period of time, and that yet retained all its former qualities. We have today the Marquis and the Garret and other species of wheat, developed by man. God created the original, the germ, but man was given the power, the power to develop, manage and control it.

Or if you will consider your flower garden, the flowers which we call the "flag," from it man has developed the Iris that grows three or four feet high, varied in color, and some with a most exquisite fragrance. But man had to interfere with Nature to accomplish this. Or take the rose. Did God create the American Beauty Rose? No. He gave man brains, and a little old wild rose of the woods, the germ, so to speak. Today, through the efforts of outstanding botanists, man has been given flowers of beauty and fragrance, and the Creator intended should be done.

But let us look at another side of the question. At the same time God created the little wild rose, He created also the weed, typical of which is the Canadian Thistle. Still he gave man the brains and the means of controlling these also, so that they may be restrained from predominating over the plants which we would have.

In your orchard are many varieties of fruit. Did God create the Stark Delicious apple, the Northern Spy, and other varieties? No. He gave man the little wild Crab Apple, and the Hawthorne, which is a miniature apple or germ, and from these he developed what we have today. Yet, according to some people's statements, if you kill the mice that griddle these fruit trees when they are small, you are "interfering with or upsetting Nature's balance."

If you are raising poultry, or other birds, and have begun to destroy and live on the birds, and you fail to take a gun and shoot the hawks, then you are not using the brains God gave you.

If your clothing were to become infested with vermin or your dwelling with rodents, you would destroy the insects or animals that were troubling you. Yet if they were consistent with the laws of God, you would have to maintain that in doing so you are "upsetting Nature's balance," since God created all these creatures at the same time. Or how about the fly, carrier of typhoid? Do you control it, or, preferring not to disturb "Nature's own" let it live? Personally, I am glad He gave man "dominion over all" these things.

Indeed, one is moved to ask the question: What would our animal world, our farms and orchards and gardens, our whole world, be like if man had not assisted with his plan? The very minute the white man discovered this continent, came ashore, cut down a tree and began to develop North America into a garden for hundreds of millions of people, that man, according to some, disturbed the balance of Nature.

As for me, I thank God for all He made, for the raw materials He gave us with which to work; that He made us in His own likeness, after His own image, and endowed us with sufficient brains to develop these raw materials and keep on discovering and bringing within reach of us all the blessings He created. To illustrate my meaning, allow me to quote the poem, "Making a Garden," written by Ida M. Thomas:

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

Man ploughs and plants and digs and weeds.

He works with hoe and spade; God sends the sun and rain and air, And thus a garden's made.

He must be proud who tills the soil And turns the heavy sod; How wonderful a thing to be In partnership with God.

I say, He wants all of us to be partners.

SUNDAY SCHOOL LESSON
SEPTEMBER 8

LYDIA AND PRISCILLA
(Christian Women in Industrial Life)

Golden text: Give her of the fruit of her hands: And let her works praise her in the gates. Proverbs 31: 11-15.

Lesson: Acts 16:1-15; 24: 28; Romans 16:1-4.

Devotional Reading: Proverbs 31: 10-31.

Explanations And Comments

Lydia a Merchant at Philippi, Acts 16:11-15. After receiving the call to come over into Macedonia and help us, Paul and his company sailed from Troas to the island of Samothrace, thence to Neapolis and then on foot nine miles inland to Philippi. This city was a Roman colony, and claimed the distinction of being "the first of the district." We know that there was great rivalry among cities for that title.

Evidently the city had no synagogue, or Paul would have gone there on the first Sabbath came. He supposed he would find a place of prayer by the river side (as was customary), and going there he was not disappointed. He met there a company of women, among them a prosperous merchant named Lydia. She was from Thyatira and dealt in purple-dyed garments. She must have been a Jewish proselyte, for it is said that "she worshipped God."

Priscilla (a Tentmaker at Corinth, Acts 18:1-3). From Athens Paul went on to Corinth, and there found a home with Aquila and Priscilla, Jews who had lately come there from Italy because they had been driven out from Rome by the Emperor Claudius. They were tentmakers like himself, and he lived and worked with them at this trade.

Priscilla, a Teacher of Apollos at Ephesus, Acts 18:24-28. After spending eighteen months at Corinth, Paul departed for Jerusalem. Priscilla and Aquila accompanied him as far as Ephesus, where they settled. A little later a Jew named Apollos, a native of Alexandria, came to Ephesus. He was mentioned again in Acts 19:1, Cor. 1:12; 3:4-6; 4:6; 16:12; Titus 3:13. He was eloquent and mighty in the Scriptures and taught in the synagogue about Jesus, though he knew only the baptism of John; that is, he had been instructed and baptized by the disciples of John the Baptist, and while his knowledge of Jesus was accurate as far as it went, it was somewhat limited. Priscilla and Aquila heard him, recognized his earnestness, his fervency of spirit, and also his defects, and taking him home explained to him the way of God more accurately.

Boy Is Good Canner
Takes Many Prizes For Vegetables, Fruits And Pickles

Red currant jelly, canned strawberries and raspberries are preserves that Allan Heagy, of Stratford, can make better than any girl under 16 years of age at the Canadian National Exhibition, Toronto.

He won first prize with his red currant jelly in the handicraft exhibits. For pickles, gherkins or mixed, he placed second. He showed that feminine hands meant nothing to him when it came to preserving raspberries and strawberries, another first prize for him, and then his canned peaches, canned vegetables and mustard pickles couldn't be equaled by the girls.

Magnetic Sweeper Useful

Picks 291 Pounds of Metal Objects Off Texas Roads

Magnetic highway cleaners have removed large quantities of nails and other metal objects from South Texas highways.

In the 18-mile stretch between Pharr and Mercedes, the machine removed 291.5 pounds of nails, scrap iron, tin cans, wire, bolts and other objects.

On highway 66, in Brooks county, the machine recently picked up 111 pounds of metal. The machine is operated by the Texas highway department.

Like the little girl who was wont to lose her whereabouts, Canadian flour occasionally loses its identity. Practically all of the flour imported into Haiti is of Canadian origin, but the greater bulk of it being shipped to Haiti through United States ports is billed as a U.S. product.

The East Indian banyan tree is distinguished by the fact that roots descend from its branches and become auxiliary trunks, thus permitting the tree to extend over a wide area.

A Real Diplomat
Mother—"You didn't ask for a second piece of cake at the party, did you, Sonny?"

Jack-No, Mother. I just asked Mrs. Green for the recipe so that you could make some like it, and she gave me another piece without my asking for it.

After feeding poultry and game birds on the poisoned bran bait used in grasshopper control, North Dakota scientists feel sure that the bait leaves the birds unharmed.

Little Journeys In Science

ALUMINUM

(By Gordon H. Quest, M.A.)

Aluminum is a comparatively new industrial metal. Iron, copper, lead, tin, and the precious metals have been used by man for ages but aluminum is a recent addition to industry. The industrial metals are all heavy substances, while aluminum is only about one-third as heavy as iron. Iron, the chief structural metal of the past, rusts easily, whereas aluminum is little affected by air or moisture.

The story of the discovery of an economical method for extracting aluminum from its ore is a most interesting one. A young American scientist, Charles Hall, decided that the decomposition of the ore by means of electricity was the best method to use. The large-scale production of aluminum is practically the same as the one devised by Hall in his workshop in 1886.

Aluminum resembles tin in appearance and can be easily hammered into very thin sheets. It is fairly hard and strong, being superior to most metals in its ductility, although not equal to steel. It is a very good conductor of heat and electricity and forms alloys quite readily with many metals.

The properties of aluminum, especially when it is made into alloys with other metals, make it suitable for a great variety of uses. Its lightness, strength, and resistance to corrosion make it a material of great importance in the construction of modern office buildings as much as 100,000 pounds of the metal have been used for such purposes as roofing, cornices, window frames, ornamental fittings, and even furniture. Gas tanks, street cars, and truck bodies are being made of aluminum, and the automobile and aircraft industries absorb approximately one-third of the annual output of this new industrial metal. In a single year the washing-machine industry required over 21,000,000 pounds.

In a finely divided state, suspended in a suitable oil, it is used as a protective paint for iron and steel, as steam pipes and radiators. It has wide use as a thin foil for radio condenser plates.

Aluminum finds an important use in the manufacture of thermite which is used extensively for welding. Thermite consists of a mixture of iron oxide and aluminum powder and when ignited the chemical reaction which takes place produces a very high temperature. By means of thermite a broken part in a machine can be welded without taking the machine apart, which is certainly a great advantage.

England Builds New Houses

Over Two Million Have Been Erected Since Armistice

Sir Kingsley Wood, minister of health, opening St. Andrews Gardens at Liverpool, England, said that more than 300 flats had been erected on the site of a former abattoir near the centre of the city. For the first time balconies had been provided on the front elevation to a number of living rooms and the horizontal treatment afforded greater window area.

Since the armistice no fewer than 2,670,500 new houses had been built in England, said Sir Kingsley, and the capital cost involved and derived from the state, the local authorities and private capitalists during that period amounted to \$8,000,000,000.

Sir Kingsley declared that the policy of the ministry of health had not led to a lowering of housing standards, and denied that there was any danger of cheapness and an indifference to the quality of the houses provided.

Superstitious But Polite

Ziegfeld Risked Bad Luck Sign

Rather Than Appear Rude

The story was told at Saratoga's Arrowhead Inn, where Ziegfeld, who was most superstitious, had taken over the bank at Monte Carlo. King Edward entered the room, placed his foot on the rung of Ziegfeld's chair, and asked: "Do you mind if I watch?"

"Not at all, your Majesty," the producer replied. He then proceeded to drop \$400,000. Not once during this session did the superstitious—but polite—Ziegfeld ask the ruler to remove his foot from the player's chair—considered a bad-luck sign by all gamblers.

A Real Diplomat
Mother—"You didn't ask for a second piece of cake at the party, did you, Sonny?"

Jack-No, Mother. I just asked Mrs. Green for the recipe so that you could make some like it, and she gave me another piece without my asking for it.

This Robin Was Clever

Called Man To Help Rescue Mate From Snake

The story of a robin which called a man to rescue its mate from the jaws of a snake was told Friday.

George Swan, attracted by a bird screaming and flapping against the back door of his home, went to investigate. The robin flew away as he approached, appearing to call him on, and Swan followed.

It led him to the end of the garden circling close to the fence, calling loudly. There in the grass Swan saw a snake with another robin in its mouth.

He killed the three-foot reptile with a stick and the two birds flew away together.

One of the most important of all the factors bringing about the alteration of prosperity and depression, says the Dominion Bureau of Statistics, is the output and value of agricultural products. In a country such as Canada, where agriculture occupies a large place among the economic activities of the nation, the crop yields cannot but affect the general business.

MISS ALADDIN

—By—
Christine Whiting Farmer
Author of
"One Wild River To Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adams tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one. Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Matthew, Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and asks Matthew if he knows why. He said: Let's go in and see. When they learn that she is having her debut but in a different setting than had been planned for her in Boston. Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Now Go On With The Story

CHAPTER XV.—Continued

To the natives of Pine Ridge the Aladdin Library seemed wonderful enough as it was. "And how every one of those blessed Adams had worked!" thought Nancy with gratitude. Father Adam's neat lettering adorned more than three hundred books which Juanita and Mary Taylor had helped her cover with brown paper. They had had a little, too. Some of the work was done on winter evenings when Jack and the Adam boys had joined them, as well as a good-looking forest ranger who appeared at church one Sunday, and had contrived to appear at the Nelson mansion at frequent intervals ever since.

Mother Adam made and donated crocheted hangings for the windows. Matthew and Mark had built the shelves: low shelves which girdled the whole room, made from lumber they "just found lying around the place," and stained dark brown. Even John, busy at school, appeared one week-end with a dozen books; and he painted four chairs found in the schoolhouse. Transformed a cheerful Chinese red, these proved such a success that he insisted on painting Nancy's "desk" as well, and a table for magazines found in Aurora's cellar; while his mother sacrificed a wicker porch chair, looking to match the hangings at the window.

"This place would be almost cozy if it weren't for the bare walls," said Mary Taylor. "But don't you mention the lack of pictures before Juanita. No knowing what impossible contribution she might bring in!"

Nancy smiled, and answered: "I'll forage in Cousin Columbine's attic. I saw an old engraving of Lincoln up there the other day."

There was also one of George Washington; and Mary appeared that afternoon with what she said her mother called "a yard of authors' photographs of the New England poets framed in oak."

Eve Adams laughed when she saw this offering.

"It brings things back, Nancy. Stored in our attic is a yard of roses; and we had a yard of kittens in the nursery. That idea used to be all the rage."

"Gee, Mum! I remember those kittens!" This was Mark pausing as he adjusted a crooked window shade.

"They had blue ribbons 'round their necks and extraordinarily long whiskers! But these are good photographs, Nancy. They'll add a literary touch to our decorations."

No wonder Nancy felt a thrill of pride at the result of her planning! Out of what a few short weeks before had been a bare and useless room, had blossomed this cheery

little place; and already the people of the village were asking if it couldn't be opened every night. Ten days ago they had had their "house-warming," with hot chocolate and doughnuts for refreshments—a party which even Victor Tubbs had roused himself sufficiently to attend!

This had been on a Saturday, and the minister who conducted services in the Pine Ridge church twice every month, arrived in time to make a speech. Nancy hadn't counted on that; but it was a good speech and she liked the minister despite the fact that he referred to her as "our dear young benefactor." Indeed, at this point in his address, Jack had been stricken with an attack of choking, and at least four Adams had winked in her direction; while the sophisticated Nancy Nelson had felt her ears grow scarlet with confusion.

Nancy smiled at the memory. She was feeling particularly happy this afternoon for good news had arrived from home. Dad was making a new start with a splendid firm, and had been offered an unexpectedly good price for the city house.

"In some ways it's a wrench to give it up," wrote her mother, "but we can't lose this chance; and in any case we shall stay in Edgemore for several years. Phil loves his school; and I am loving the life of a country town again. It's such a joy to see your father his cheerful self once more. These anxious months have brought him some grey hairs; but he's happy and interested now, and wondering if you're not almost ready to come home. . . ."

Home! The girl drew a long, long breath. It would be wonderful to see Dad and Mother and Phil and the aunts, and all the old crowd, of course; but Cousin Columbine was going to miss her frightfully. And she couldn't leave until the library was running smoothly and she found somebody to fill her place.

Nancy leaned forward, lifting a child's bank which was placed on her desk for voluntary contributions, and smiled as a reassuring rattle met her ears.

The first donation had come from a small girl who said, as she dropped in a shining penny: "It's to help your library, Miss Aladdin!" Nothing had ever pleased Nancy half so much as this innocent mistake in her identity. Matthew Adams, who overheard it, had thrown her a smile of appreciative understanding; while his father was so delighted with the appellation that he'd addressed her as Miss Aladdin ever since.

The bank had flourished. Yesterday Juanita had contributed the price of three cottonseed magazines, and was really enjoying some decent novels. Two boys from a nearby ranch whom Nancy had supposed little better than morons, were devouring good travel books; and the wife of a health-seeker two miles back of the village, told Nancy with tears in her eyes that it "like heaven" to have something to read again.

"And to think," said Cousin Columbine when the girl recounted this pathetic incident, "that I've been too thoughtless to look up those people and see their needs. But so many folk come and go that we take them too much for granted. I'm ashamed of myself. No wonder they call you Miss Aladdin!"

Steps sounded without, and Nancy glanced up. It was not yet two o'clock, but someone was coming. Then the door swung back to admit her brother and Matthew Adams. Luke was about again now; and Jack was job hunting.

"Any luck?" asked Nancy, as the boys drew up two gay red chairs.

Matthew nodded.

"Your kid brother seems to profit by the misfortunes of others. Luke breaks a leg, and Jack gets his job. And now my Uncle Tom (Mother's brother, who has a ranch out on the plains), is down with flu along with two of his men, and has sent an S.O.S. for one of us fellows to help them out. Mark's drawn the unlucky number, and Jack's going back to the ranch again to take his place."

"We'll said Nancy. "I'm sorry to have Mark go, of course, but it's marvelous for Jack; and sometimes there are complications after flu!"

"A lot of sympathy you have for Uncle Tom!" grinned Matthew.

Nancy laughed.

"I was merely wondering how long the job would last. Time goes so rapidly; and some day we've got to turn our faces to the East, you know."

Jack said nothing; and suddenly Matt's color rose.

"Why—you're not leaving us this spring, are you? I—I mean," said Columbine said "you'd stay a year!"

"I know; but such a thought never entered our heads, Matt. And now Dad's made another start I'm pretty sure they'll want us to come home. Not that I don't dread leaving Cousin

Columbine. I'm awfully afraid she's going to miss me!"

Jack, still silent, arose and went over to a window. Matthew sat looking into space. "Some—some of the rest of us will miss you too, Nancy," he said surprisingly.

Nancy laughed outright, and asked, eyes lighted with merriment: "Why apply a pretty speech like that, Matt?"

"Spill it?"

Jack came back, grinning, and slumped into the cushioned chair.

"She means, old man, that this was no time to mention Mother! Honest, Nancy, have we got to go home this spring?"

"You don't want to?" questioned his sister.

"Do you?" he countered.

The girl was silent, looking down at the toe of Matthew's boot. "I don't know, exactly," she said at last. "I'm crazy to see every one at home, of course; though I'd rather stay here through the summer. But I wonder if Cousin Columbine won't miss us even more if we leave her in the fall. Spring's a cheerful time of year, you know; and she's getting old."

It was Matthew's turn to stand at the window, from which she retreated. He said over his shoulder: "You're going to leave a big hole in Pine Ridge, folks."

"Well," observed Jack, "we haven't gone yet, feller; and don't they tell us that it's better to have loved and lost than never to have loved at all?"

He laughed, but Matt, still gazing at Pike's Peak, responded soberly: "Whoever wrote that bunk was feeble-minded," and added, moving toward the door, eyes turned discreetly away from Miss Aladdin: "Come on, Jack, we must get going. Mark'll drop in to-morrow to say good-bye, Nancy, Luke's driving him to the Springs where somebody from Prairie Ranch will pick him up. He says he feels as if he were sentenced to Siberia, though it's the first time he hasn't jumped at the chance of going to Uncle Tom's!—I—I wonder why."

Nancy smiled at this subtle compliment, and went to the door to watch the boys depart. There was a glimpse of the plains from her little porch, and as they lingered a moment the girl asked, her eyes on that undulating vista: "Does your uncle live right on the prairie, Matt?"

The young man nodded.

"Sixty miles out, in a big old rambling ranch house surrounded by cottonwoods—a bully place. Those plains are wonderful, Nancy, and sometimes treacherous, too. We'll take you out after the weather's settled. No knowing what thrilling adventures we may have!"

Light words. . . . Matt little thought that only a few weeks later they would come back to him during long, tragic hours which none of them was ever to forget.

(To Be Continued)

Joins Gallery of Fame

Man Who Sold Mauretanian's Furnishings Had Voice Recorded

A record of the auctioneer's voice was made during the sale of the Mauretanian's furnishings, and will be stored away for the benefit of posterity in the Gallery of Famous Voices and Famous Occasions in Broadcasting House in London. The auctioneer's voice will keep company with those of Britain's greatest men and women, from the King and Queen down.

Meat packing, the nation's largest industry from the standpoint of the value of its products, is employing 16 per cent. more persons on a pay roll 38 per cent. larger than a year ago.

Tuberculosis causes more deaths between the ages of 14 and 46 years than any other disease.

Place Of Historic Interest

Fort Churchill Elongated With Stories of Courage and Disaster

The other day Fort Churchill, Canada's northern port on the Hudson Bay and the prairie's back door to the salt seas, was celebrating the opening of its shipping season. As a public issue the development of Churchill has been almost talked out. It was ridiculed and bitterly attacked when the rails were being laid and the grain terminals were under construction. But as a place of historic interest it has great significance and fascination.

For more than three hundred years ships have sailed into the Hudson Bay from the ports of Great Britain and Europe. Into it came the early explorers in their search for the northwest passage to the Orient and Cathay. By this route the first live stock and the first piano ever brought to the opening west were freighted by sturdy sailing vessels.

And at Churchill English and French held forts now crumbled into ruins. Here the Danish explorer, Munk, in the early part of the seventeenth century, survived a bitter winter in which most of his companions perished. Many decades later, in 1812, the gallant Selkirk settlers struggled with nature in the environs of the port; held their chin high through a steady test of cold before they could start on the trek to their new homes in the south.

Churchill is eloquent with stories of courage, treachery and disaster.

The sub-Arctic holds its lure to the adventurous to this day. The annals of this new Canadian port may still remind us of the determination of the pioneer explorers and settlers to break the hostile barriers of nature in a new land—Hamilton Spectator.

The Anthony Eden Touch

London Busman Made German Passenger Feel At Home

Whether London Transport is aware of it or not, at least one of its staff possesses the Anthony Eden touch.

On a wet-bound 19 bus a young German seated in front of me tendered his money with the word "Piccadilly." The conductor asked which end of Piccadilly he meant, but the passenger's English was limited to the one word "Piccadilly."

Thereupon the conductor broke in to assist German, and the matter was adjusted. The delighted passenger moved to a seat beside the door, and a long conversation, glowing with international amity, followed.

They parted with effusive Auf weidesehens—London Daily Sketch.

Egyptian Shorthand

Papers Recently Discovered Show System Many Centuries Old

Three pieces of ancient Egyptian "paper" were discovered not long ago. On them were marks which proved very interesting, for they were clearly a system of shorthand many centuries old. Actually these treasures dated from the third century A.D., and there could be no doubt about them, for there was a perfectly good longhand "translation" given with the shorthand signs. It was this last fact which made the documents most interesting, for it gave the key to other manuscripts which until then had been mysteries that nobody was able to explain.

In Trinidad, West Indies, whence much of the grapefruit comes to Canada, the planters have to depend solely on rainfall. Grapefruit grown in the United States in California and Florida, in Palestine in Asia, and in Rhodesia, South Africa is produced under controlled irrigation.

During the last 10 years, a total of 22,000 earthquakes has been recorded in Japan.

THE WILSON FLY PAD CO., Hamilton, Ont.

Little Helps For This Week

The Lord shall give thee rest from thy sorrow and from thy fear, and from the hard bondage wherein thou wast made to serve. . . . Isaiah 14:3.

Today beneath thy chastening eye, I crave alms for peace and rest; Submissive in Thy hand to lie, And feel that it is best.

O Lord, who art as a shadow of a great rock in a weary land, who be- holdest Thy weak creatures weary of labor, weary of pleasure, weary of hope deferred, weary of self; in This abundant compassion and unutterable tenderness, bring us unto Thy rest.

Thou hast made us for Thyself, and our heart is restless until it rests in Thee. Grant to us above all things that can be desired, to rest. Thee, to have our hearts at rest. Thee, at the true peace of the heart, Thou only art rest. In this very peace that is in Thee, the one Chiefest Eternal Good, we will sleep and rest.

Demand For Maps

Search For New Mineral Deposits Calls For Detailed Information

A marked increase in the demand for maps, among prospectors, sportsmen, foresters, engineers, and other classes, is reported by the Topographical and Aerial Survey Bureau of the Department of the Interior. During the last fiscal year 90,000 copies were distributed by the bureau, in comparison with approximately 70,000 during the preceding year.

The intensive search for new mineral deposits during the year was an important factor in the increase, while the desire of sportsmen to secure detailed maps of an area, when planning fishing; hunting or canoe trips, had a marked tendency to further increase the demand. The fact that a great many of the maps of the bureau are made from photographs taken from the air, thus ensuring a completeness of detail that does not prevail in the case of the older maps, also contributed to the increase.

A total of seventy-two maps of different districts throughout Canada are in course of preparation by the bureau and many of the areas being covered give promise of early mineral or other development.

A catalogue of the 1000 or more maps at present available has been published and copies may be obtained, without charge, upon application to the Surveyor General, Department of the Interior, Ottawa.

Turkish Law For Men

Compels Them To Wear Hats With Brims

If being allowed to wear what you like is a symbol of freedom in general, Turkish women are distinctly freer than Turkish men. The men today are compelled by law to wear hats with brims. The brim is to prevent him from touching the ground with his forehead, as religious custom prescribes, when he is saying prayers. The women may wear what they choose.
